

Geology (Paperback)

By Evan-Moor Educational Publishers

Evan Moor Educational Publishers, United States, 1998. Paperback. Condition: New. Teacher ed.. Language: English . Brand New Book. Geology covers these concepts: - Earth has layers - Earth's crust is made of rock and soil - soil is made when rocks break down and mix with decaying plants - rocks have different properties - rocks are formed in different ways - the surface of the Earth is always changing - the resources we use come from the Earth - some rocks contain fossils that tell about life on Earth long ago. A variety of engaging activities present the concepts in ways that students can understand. Each concept presented includes: - teacher directions for lessons - reproducible resource pages such as sets of picture cards, minibooks, and lab sheets to record the results of hands-on investigations.

Reviews

Extensive information for book fans. It is written in basic words and never hard to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Otis Wisoky**

This publication is great. It is full of wisdom and knowledge. You will not really feel monotony at any time of the time (that's what catalogs are for relating to when you ask me).
