Reviews

*It in one of my favorite publication. Indeed, it can be play, nonetheless an interesting and amazing literature. I discovered this publication from my i and dad suggested this publication to understand.
(Camryn Williamson)*

DEUTSCHER

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 286 pages. Original publisher: U. S. Environmental Protection Agency, Office of Air Quality Planning and Standards, 2005. Excerpt: . . . A complete description of the configuration and evaluation of the 2001 meteorological modeling is contained in McNally (2003), however some of the key model physics options are as follows: Cumulus Parameterization: Kain-Fritsch Planetary Boundary Layer Scheme: Pleim-Chang Explicit Moisture Scheme: Reisner 2 Radiation Scheme: RRTM longwave scheme Land Surface Model: Pleim-Xiu Four-Dimensional Data Assimilation (FDDA): analysis nudging only The annual MM5 simulation was divided into four separate periods: 12 16 00 to 4 05 01, 3 16 01 to 7 05 01, 6 14 01 to 10 02 01, and 9 17 01 to 2 04 02. Within each of these periods the model was run for 5 days blocks with a restart occurring at 1200 UTC every fifth day. To assure continuity in the surface moisture, the model initial conditions were updated with the soil conditions from the end of the previous 5 day period using the EPA INTERPX processor. In terms of the 2001 MM5 model performance evaluation, we used an approach which included a combination of qualitative and quantitative analyses to assess the adequacy of the MM5 simulated fields. The qualitative aspects involved comparisons of the model estimated sea level pressure and radar reflectivity fields against observed values of the same parameters from historical weather chart archives. The statistical portion of the evaluation examined the model bias and error for temperature, water vapor mixing ratio, and the index of agreement for the wind fields. These statistical values were calculated on a regional basis. The results of the evaluation indicate that the 2001 model data had a bias in surface temperature...
