*This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.*

Neuware - The Fourth ECMI Conference on Industrial Mathematics took place at Strobl in Austria, May 29-June 2, 1989. The conference was devoted to the exchange of ideas, models and methods from various fields of industrial applications of mathematics. About 140 people from 21 countries attended the meeting. The aim was to bring together people from industry and from university. In this respect the organizers were only partly successful! The participation of about 20 people from industry shows that there is still much work to be done to increase the acceptance from this side. 72 speakers presented their results as invited or contributed lectures, or in the frame of 2 minisymposia. One minisymposium was organized by Heinz W. Engl and focused on steel processing, the other one, organized by Hansjörg Wacker, dealt with chemical engineering. These proceedings consist of 56 papers. The articles within each of the sections: Invited Lectures, Minisymposium Steel Processing, Minisymposium Chemical Engineering, and Contributed Lectures are in alphabetical order of the first author. Except for the contributions to the minisymposia, which clearly concentrate on the corresponding topics, it is hard to find a reasonable classification of the papers. This, we believe, is typical for industrial mathematics and underlines the vast variety of fields where mathematics could be used to support problem solving. We would like to acknowledge the valuable work of the referees of the articles who certainly helped to improve the quality of this volume. 448 pp. Englisch.
