EAE Dez 2012, 2012. Taschenbuch. Book Condition: Neu. 220x150x4 mm. This item is printed on demand - Print on Demand Neuware - Se realizó un estudio observacional descriptivo de corte transversal para determinar el estado de salud de la población del municipio Taguasco, en el período comprendido entre el 1ro de enero al 31 de diciembre del año 2011. La población estuvo constituida por un total de 33974 habitantes que comprenden los individuos residentes en el Área de Salud: atendidos por Médicos y Enfermeras que son el principal recurso para la instrumentación del estudio. Una vez identificados los principales problemas se determinan como prioridades el aumento de la morbilidad por enfermedades del corazón y tumores malignos, los estilos de vida inadecuados en pacientes con E.C.N.T (Hipertensión Arterial y Diabetes Mellitus), la alta prevalencia de adicción tabáquica, el aumento de embarazo en mujeres adolescentes, y el deficiente saneamiento básico ambiental del área. Se propone un plan de acción para solucionar la problemática identificada. 72 pp. Spanisch.
